Education is at the heart of everything we do.

Through collaborating with teachers, technology partners, and academic researchers at the University of Oxford, we work to create the best possible environment for learning and teaching.

Through working with technology partners we’re shaping the way learning happens in the digital classroom with a range of resources that include innovative classroom presentation tools, interactive e-books and apps, and online testing.

Oxford invests only in education. This year, for example, we are funding research into English medium instruction with the Oxford University Department of Education (OUDE) and lecturers from universities in Turkey. The research will inform our future publishing.

As a department of the University of Oxford, we share the same mission of furthering education everywhere. In Italy, for example, our Read On! project has helped to deliver mobile libraries to schools in deprived regions, helping students discover a love of reading.

I invite you to join us in shaping learning together.

Peter Marshall,
Managing Director,
English Language Teaching

One of the things we’ve most enjoyed about giving teacher training was meeting many of the teachers who were involved in creating English File. Their feedback has helped greatly to shape the third edition.

Christina Latham-Koenig
and Clive Oxenden

... a truly eye-opening experience on how to introduce graded readers into the classroom with the Read On! project. I would never have believed my classes would be bickering over books!

Medina Caulati,
Highlands School,
Rome
We believe that education changes lives.

Every day we make a difference in people’s lives through education and learning English. We would like to share with you a few examples of how we are shaping learning together.

Using the *Oxford Advanced Learner’s Dictionary* convinced Botho Mothibi that she wanted to work for Oxford. Today she is OUP South Africa’s School Sales Director.

We are proud to support the Emirates Airline Festival of Literature by sponsoring the book of winning entries.

Every year, we donate books to schools in developing countries so that students are able to learn English.

We share insights into educational theory and practice through our professional development titles, White papers, and through *ELT Journal* which we co-sponsor with IATEFL.
Every year, we donate books to schools in developing countries so that students are able to learn English.

The Oxford Teachers’ Academy training helped me think about learning and students in a different way – to create a warmer atmosphere, relax students, and make them enjoy the classes.

English teacher, Brazil

Our new course for adults, Navigate, is informed by research into how adults best learn languages, under the guidance of Dr Catherine Walter, Oxford University Department of Education.

We worked with Microsoft, harnessing cloud technology to develop Oxford Learner’s Bookshelf for Office 365. As Education Industry Partner, we shared our experience at Microsoft’s Worldwide Partner Conference.

Elements of Success, Grammar for Language Learning, evolved through listening to over 1,000 teachers in 16 countries talking about the challenges of learning and teaching grammar.

Show and Tell gives you the tools to develop children’s 21st century skills, creating young thinkers with great futures.

- End-of-unit class projects consolidate learning and encourage children to work collaboratively.
- Opportunities to ‘Show and Tell’ allow children to present their projects in class or at home, and to talk about what they have learned – in English!
- Stories, hand–eye coordination practice and letter formation activities lead to reading and writing simple sentences.
- Problem-solving activities encourage critical and creative thinking.
- Literacy Books and Numeracy Books provide extra skills practice.
- Use with Oxford Discover to create a nine-level course (see page 8).

Show and Tell taps into children’s natural curiosity, asking a question such as ‘Who makes you happy?’ or ‘What do our senses tell us?’ as the focus for each unit. Activities encourage children to explore the question while learning the language they need to think and talk about it.

Illustrations support the Big Questions, creating interest and excitement

4. **However, some animals adapt in a different way – they travel thousands of miles to a different habitat. This is called migration. Animals migrate for different reasons. Some, such as salmon, travel from the ocean to rivers to breed, because it's safer for their young there. Others, such as monarch butterflies, migrate south to spend the winter in a warmer habitat.**

5. **Migration is one of the most amazing phenomena in the animal kingdom.**

### Reach Out

Hi! I’m Chantal!

Hi! I’m Chantal! I moved to Chelsea from Paris a few years ago. My apartment is very small, but it’s the most beautiful place I’ve ever lived. Chelsea Market is one of the biggest markets in the city. People often buy food at the market and bring it home to cook. There are usually a lot of people at the market, but it’s fun to browse and see wonderful things.

I live in Chelsea. It’s probably the most popular neighborhood in the city. There are many different types of people in my neighborhood. Chelsea Market is one of the best places to eat, and it’s also one of the most popular places to shop. Chelsea Market has a lot of tourist attractions, and it’s one of the best places to visit in New York City.

The 30-day challenge quickly became very popular. Around the world, people have watched his talks and the challenge spread. Many people have done it for fun, or to give up something for 30 days. As he did harder challenges, he got more confident. He learned that if he really wanted to do something for 30 days, you can break the habit. If you stop doing something you want to add to your life – or move onto harder ones, like writing a novel in 30 days it can become a habit. If you stop doing something you want to give up – and try it every day for 30 days.

So he started to set himself 30-day challenges. Before he tried 50 for 50 days. To really give up something for 30 days, you can break the habit. If you stop doing something you want to add to your life – or move onto harder ones, like writing a novel in 30 days it can become a habit. If you stop doing something you want to give up – and try it every day for 30 days.

Discussing opinions

You may be taking an exam where you and a partner have to discuss something. For example: picture that the examiner shows you. You may not have to describe the picture in detail, but you’ll interpret the situation that they show and express an opinion about them. You must make sure that you take part in the conversation, but also that you involve your partner.

Look at the picture and discuss the questions. What are the good and bad points about cycling? Which situation in the picture seems more dangerous for the cyclist?

Well, my opinion, the best thing about cycling is the exercise. You can go from A to B and keep fit at the same time. What do YOU think?

Yes, bikes are better for the environment.

Well, I would say it’s OK in the first picture, but not in the second one.

Well, it’s OK in the first one because there’s a roundabout, but not in the second one, as the cycle is in the middle of the road. And it looks quite dangerous.

I think you’re right. But there is plenty of space. Of course, it’s much more dangerous in the second picture.

Different ways of going and responding to opinions.

1. Give one-word answers to a question.

2. Indicate personal opinions and relate the topic to your own life.

3. Relate your comments to the photographs.

4. Use questions or question tags like ‘isn’t it?’ to involve the other person in the conversation.

Yes, and I think the man in the first picture should think twice.

So which place do you think looks more dangerous in the second picture?

Well, in my opinion, the best thing about cycling is the exercise. You can go from A to B and keep fit at the same time.

On the whole, I think it’s more dangerous in the second picture.

I agree.

No, and I really think you’re right.

I think drivers should respect cyclists more.

Yes, I suppose so.

New Elements of Success

Grammar for Language Learning
HIGH-BEGINNER TO ADVANCED (A2–B2)
RANDEE FALK, MARI VARGO AND ANNE EDIGER (LEVEL 1)
LINDA LEE AND ANNE EDIGER (LEVELS 2 AND 3)

Elements of Success helps students learn grammar and remember it. It covers the grammar students find when reading academic texts, as well as the grammar they will need to communicate in English and to write effectively.

- Highly visual charts are easy to navigate, present grammar clearly and alert students to common mistakes.
- Extensive practice activities, adaptable to the needs of your students, ensure students retain their learning, reducing time spent re-teaching the same grammar points.
- Topic-based activities practise the grammar in context, helping students to learn how to apply their grammar learning, and leading to long-term retention.
- Open-ended activities – Talk about it, Write about it, and Think about it – require critical thinking skills and integrate practice of listening, speaking, reading and writing skills.
- Charts and activities all use authentic, corpus-based language based on the 2-billion-word Oxford English Corpus so that students learn grammar as it is used.

to go to the theatre with her husband that evening, and never saw him again. Suddenly I felt very angry. ‘We must find Vizagapeta’s killer. Holmes,’ I said. ‘We must do it for his wife.’

Holmes looked at me with his cold, blue eyes, but said nothing. How he closed his eyes again.

After some minutes, we turned left London Bridge Station. How much did my friend truly understand about Colón’s “alcohol?”

At Vizagapeta Station, we got off, and waited for a cab.
‘Where are we going now, Holmes?’ I asked.
‘Worsted, a visit many people.’

‘But let us new go to the house of Dr James Wren. He’s responsible for the experiment – or was responsible for them before all this happened. He’s a good and important man. My brother tells us. We must find him by them.’

Holmes looked at his watch. ‘We must wait for longer.’

‘I need to call to Sir James Crow, Watson.’

We walked from the station to Sir James’s house.
‘Ceridwen again!’ Merlin thinks. He moves here and there in the sky, but he can’t lose the eagle. Just then, Merlin sees a hunter far down in the forest. And there’s a sudden noise — ‘Whoosh’! An arrow hits Ceridwen. She falls to the ground near her house. Morfran runs to her dead body. ‘Merlin, you demon!’ he cries angrily. ‘One day you must die for this!’
Interesting, exciting stories hold students’ attention.
“The most consistent of all series in terms of language control, length and quality of story.”

Oxford Applied Linguistics
SERIES ADVISERS: ANNE BURNS AND DIANE LARSEN-FREEMAN
A series of titles providing thorough yet accessible coverage of topics at the forefront of applied lingui language use. The goal of the series is to influence the quality of language education through publishing and disseminating relevant scholarship and research. The authors of the series are noted authorities in their fields.

NEW EDITION Understanding Second Language Acquisition
Second Edition
† Winner BAAL Book Prize (First Edition)
ROD ELLIS
In this revised edition, Rod Ellis provides an authoritative and fully updated introduction to key areas of theory and research in second language acquisition for a readership of postgraduate language teachers. He presents different theories of second language acquisition and examines critical reactions to them. This updated edition reflects recent research trends looking at cognitive and social aspects of L2 acquisition, and new chapters include Age and L2 acquisition, and Psychological factors and L2 acquisition.

NEW Academic Publishing: Issues and Challenges in the Construction of Knowledge
KEN HYLAND
This book provides an authoritative discussion of various aspects of writing for academic publication. It explores a range of challenges and issues, from the impact of English as a global academic language and the growth of the assessment culture surrounding publication, to the practices of knowledge construction at institutional and local levels. Academic genres are discussed, as are the processes that scholars writing in these genres go through as they get published.

Second Language Learning in the Early School Years: Trends and Contexts
VICTORIA A MURPHY
At a time when children around the world are increasingly required to learn a second language in the primary classroom, this book provides a much-needed overview of current themes and research on child second language learning. The author emphasises the importance of examining findings in the educational context in which the research was carried out, and highlights the similarities and differences in child L2 learning across different contexts.

Understanding English as a Lingua Franca
BARBARA SEIDLOHER
The spread of English as the international lingua franca (ELF), like other aspects of globalization, calls for a reconsideration of conventional ways of thinking. This book argues that ELF needs to be understood as an entirely natural use of language in its own right and not as an erroneous version of native-speaker English, and demonstrates how the ‘non-conformist’ formal features of ELF are functionally motivated by the dynamics of communicative interaction.

Translation in Language Teaching
GUY COOK
A survey and critical assessment of arguments for and against translation in different English language teaching contexts, this book proposes ‘translation’ as one of a number of ways of relating English to students’ own languages. Establishing a new direction in practice and research, it discusses ways in which translation might be incorporated into materials, curriculum development, and teacher education.

Input, Interaction, and Corrective Feedback in L2 Learning
ALISON MACKLEY
Input, Interaction, and Corrective Feedback in L2 Learning describes the cognitive processes involved in interaction-driven second language learning and presents a methodological structure for studying them. It provides a comprehensive and up-to-date survey of the work on interaction that has emerged since the mid-1990s, while also characterizing the recent shift to an exploration of cognitive factors in evaluating how interaction works.

Sociocognitive Perspectives on Language Use and Language Learning
EDITOR: ROB BATSTONE
The contributors to this volume argue that in order to understand the processes of language use and language learning we need to understand how social and cognitive factors work interdependently. This book covers a wide range of issues of importance both to SLA researchers and to students, including the ways in which social and cognitive factors interweave in the shaping and directing of learner participation in classroom interaction and the implications of sociocognition for SLA theory.

Language Assessment in Practice
† Winner Sage/ILTA Book Award 2012
LYLE F BACHMAN AND ADRIAN S PALMER
Language Assessment in Practice is a fully revised second edition of the best-selling Language Testing in Practice. It allows readers to become competent in the design development and use of language assessments. The authors discuss concepts and procedures clearly, illustrated with examples.

The Multilingual Subject
† Winner MLA Kenneth W Mildenberger Prize
CLAIRE KRAMSCH
By drawing on multiple examples of real-world language learning situations, this book explores the subjective aspects of the language learning experience. The author encourages readers to consider language learning from new, diverse, and unique perspectives. The book analyzes data from a variety of sources, including language memoirs, online data from language learners in chat rooms, and text messaging exchanges.

Thinking About Language Teaching
Selected articles 1982–2011
MICHAEL SWAN
A selection of Michael Swan’s best known published articles on the theory and practice of teaching English as a foreign language.
The Psychology of Second Language Acquisition
